

50% OCCUPANCY

On April 30th, 2020 the office of the Uvalde County Judge submitted an ATTESTATION to the Texas Department of State Health Services indicating as of that date the County of Uvalde had fewer than five cases of COVID-19. (The County actually had no active cases on that date). That certification allows facilities within the county to operate at 50% occupancy consistent with GA-18 and DSHS minimum health protocols.
